Correction

The authors of "Lack of heart rate changes during an attention-demanding task after right hemisphere lesions," which appeared in the April issue (pp 624-630), have indicated a correction. On page 627, in the first paragraph of column 2, the third sentence should have read as follows: "The LH group did not lengthen *IBI* in the 6-second PI, but did in the 10-second PI." The correction is denoted by italics.
