Correction

In "Effects of transcranial magnetic stimulation on ipsilateral muscles" by Wassermann et al, which was published in the November 1991 issue (*Neurology* 1991;41:1795-1799), an error appears in figure 1. In the figure, the arrow indicating time of delivery of the stimulus should have been placed at the beginning of the traces. The corrected figure appears below.

Figure 1. Responses from abductor pollicis brevis (APB) in 20 consecutive trials of magnetic stimulation delivered to the ipsilateral hemisphere during 50% maximal contraction. Traces are aligned to the stimulus (arrow).
