A 22-year-old man presented with new-onset, gradually progressive diffuse headache for 2 months. He exhibited no apparent physical or neurologic abnormalities except for limited bilateral lateral rectus movement and bilateral papilledema on fundoscopic examination. An MRI examination of the brain showed multiple nodular-enhancing lesions along both sides of the falx cerebri with perilesional edema.
edema. In addition, these nodular structures formed a branching network of thickened dura mater to adjacent nodular structures (Figure 1). Due to these atypical features, the differential diagnosis included tuberculosis, sarcoidosis, immunoglobulin G4–related disorders, lymphoproliferative disorders, meningioma, hemangiopericytoma, and Erdheim-Chester disease.1 A stereotactic biopsy was performed. The pathologic and immunohistochemistry results and systemic evaluation were compatible with primary CNS anaplastic large cell lymphoma with ALK+.2 After a total of 6 courses of high-dose methotrexate and ifosfamide followed by whole-brain radiation, the patient achieved complete remission and resolution of headache (Figure 2).

Anukoolwittaya: drafting/revision of the article for content, including medical writing for content; major role in the acquisition of data; study concept or design; and analysis or interpretation of data.

**Acknowledgment**

The authors thank the Hematology and Radiation Oncology team, King Chulalongkorn Memorial Hospital, for the support and care of the patient.

**Study Funding**

No targeted funding reported.

**Disclosure**

The authors report no relevant disclosures. Go to Neurology.org/N for full disclosures.
Infographics Available on Select Articles

Infographics are an exciting feature available across the Neurology® journals, providing an engaging and convenient way to understand the information presented in select articles. All infographics are created by a team of scientific writers and illustrators and undergo a rigorous review process involving input and feedback from the author and Neurology editors.
