Author Tip

An important part of publishing is promoting your work. Using popular sites like Facebook and Twitter is a fast, free way to share your work with a wide audience. Use hashtags so your posts can be easily found (e.g., #Neurology or #Parkinsonsdisease). Users following those hashtags will see your posts when they otherwise might not have. Using images tends to draw in more readers rather than using plain text. If you are interested in having *Neurology* promote your published article on our channels or would like to learn more about using social media, please contact msorenson@neurology.org.

Drug may help those with dementia with Lewy bodies reduce movement symptoms without worsening psychiatric symptoms

New help may be on the way for people with dementia with Lewy bodies. "We found that adding zonisamide to the current dose of levodopa was safe and improved movement symptoms in those with dementia with Lewy bodies without magnifying hallucinations, delusions or agitation," said study author Miho Murata, MD, PhD, of the National Center of Neurology and Psychiatry in Tokyo, Japan.

Murata M, Odawara T, Hasegawa K, et al. 2018;90:e664–e672. doi.org/10.1212/WNL.0000000000005010.
