Notable from Our Podcast

The January 2, 2018, featured interview was about clinical biomarkers and differential diagnosis of transverse myelitis. For the “What’s Trending” feature of the week, you will hear a discussion on the recent Clinical Trials in Alzheimer Disease conference.

Author Tip

Neurology defines an author as a person who has made a substantive intellectual contribution to the submitted manuscript. A substantive contribution includes one or more of the following: design or conceptualization of the study; analysis or interpretation of the data; and drafting or revising the manuscript for intellectual content. Professional writers employed by pharmaceutical companies or other academic, governmental, or commercial entities who have drafted or revised the intellectual content of the paper must be included as authors.

Will a salad a day keep memory problems away?

Eating about one serving per day of green, leafy vegetables may be linked to a slower rate of brain aging. “Adding a daily serving of green, leafy vegetables to your diet may be a simple way to foster your brain health,” said study author Martha Clare Morris, ScD, of Rush University Medical Center in Chicago. “Projections show sharp increases in the percentage of people with dementia as the oldest age groups continue to grow in number, so effective strategies to prevent dementia are critical.”

Morris MC, Wang Y, Barnes LL, et al. *Neurology* 2018;90:e214-e222.
