Notable from Our Podcast

The July 24, 2018, featured interview highlighted a study on exposure to organic solvents and increased risk of multiple sclerosis. For our What's Trending feature of the week, you will hear a discussion on whether neurologists should be the primary caregiver for patients with functional disorders. This interview was recorded at the 2018 American Academy of Neurology (AAN) annual meeting in Los Angeles.

Author Tip

A hybrid open access (OA) option is offered to authors whose full-length articles or reviews have been accepted for publication (not all manuscript categories are eligible for this option; please contact the Editorial Office for details). Authors submitting work to *Neurology* will be given the opportunity to select the OA option at the revision stage of the peer-review process, contingent upon acceptance of the paper. This choice has no influence on the peer review and acceptance processes. These articles are subject to the standard peer-review process and will be accepted or rejected based on their merit. The article processing charge depends on the type of funding. For more information, please see Neurology.org/open-access/neuro.

Feel lightheaded when standing up? You may have a greater risk of dementia

People who feel faint, dizzy, or lightheaded when standing up may be experiencing a sudden drop in blood pressure called orthostatic hypotension. Now a new study says middle-aged people who experience such a drop may have a greater risk of developing dementia or stroke decades later. "Orthostatic hypotension has been linked to heart disease, fainting, and falls, so we wanted to conduct a large study to determine if this form of low blood pressure was also linked to problems in the brain, specifically dementia," said study author Andreea Rawlings, PhD, MS, of Johns Hopkins Bloomberg School of Public Health in Baltimore, MD.

Rawlings AM, Juraschek SP, Heiss G, et al. Association of orthostatic hypotension with incident dementia, stroke, and cognitive decline. *Neurology* 2018;91:e759-e768. doi.org/10.1212/WNL.0000000000006027
