

WHAT'S  
HAPPENING  
IN

# Without Borders

## From the Editor

Gretchen Birbeck, MD, MPH

Without Borders includes a section titled, Latest Articles, that showcases relevant articles published in any of the 4 journals included in the *Neurology* family, as well as work from *Neurology's* Resident and Fellow Section. As these papers are archived in the section, readers with an interest in global neurology can peruse the growing list that going back over a decade.

The archives page includes a sidebar with a breakdown of the number of papers in global neurology that were published within a given time frame (e.g., from 2010 to 2014 there were 59 papers designated as fitting in the global neurology category). At a glance, a reader can see that interest in this topic is rapidly increasing as more papers are being submitted and published every year. The sidebar also notes which of the journals are publishing the greatest number of global neurology papers and what associated topics are being covered, from stroke to ethics.

We encourage readers, and authors looking to submit their global neurology scoped work to one of the *Neurology* journals, to visit the archives. A sampling from early July shows a Resident & Fellow neuroimage, Teaching NeuroImages: Hippocampal sclerosis in cerebral malaria; an article, Current treatment practice of Guillain-Barré syndrome; and even a Visions paper, Patient hand and artistic depiction of chronic inflammatory demyelinating polyradiculoneuropathy<sup>1-3</sup>. It perfectly showcases the wide range of papers one can find in the collection.
