Child Neurology: Andersen-Tawil syndrome

Neurology® 2020;94:187. doi:10.1212/WNL.0000000000008828

Two images of patients in the article “Child Neurology: Andersen-Tawil syndrome” by Almuqbil and Srour,¹ published online March 16, 2015, have been removed because the patients requested that their consent for publication be withdrawn. The removal of the images does not invalidate the paper because an extensive verbal description of the patients was included within the text of the article. The American Academy of Neurology, who owns copyright of the article, the Editor of the journal, and the authors agreed that the images were unnecessary to the message of the paper and agreed to honor the request to remove them.
