The Neurology® journal Equity, Diversity, & Inclusion (EDI) specialty site is an online forum that highlights content related to EDI topics, provides a welcoming, respectful, and safe environment for the neurology community to amplify their perspectives and lived experiences, and shares opportunities that advance EDI within and beyond the field of neurology.

Voice: Lived Experiences

The latest issue includes an impactful Voices piece written by medical student Ramon Villaverde-Castaneda, "Border Reflections: Medicine and the Wounds of Community". In this contribution, he shares his memory of the deadliest xenophobic attack against the Latino community living in the United States, which occurred in his hometown of El Paso, Texas. His reflection covers topics related to migration and reminds us that embracing and celebrating cultural differences is a critical step as we foster connection and community. Furthermore, he emphasizes the importance of reflection combined with action to tackle inequity in neurology, including during the ongoing COVID-19 pandemic that has overburdened communities of color at and beyond the Texas border.

Latest Articles

As a hub for EDI-related content for the Neurology journals, the EDI specialty site is updated regularly with the latest relevant articles. In addition, the Editors actively review related publications in the general media. We recently listened with interest to the Neurology Podcast "Special Report: Changing Neurology Education", in which Dr. Ima Ebong and Dr. Eseosa Ighodaro discuss their journey in neurology and their impactful work broadening diversity and inclusion in neurology through education.

Did You Know?

This section is updated regularly and intended to highlight EDI facts and resources for anyone in neurology. The latest iteration reminds readers that ensuring language concordant services is critical to achieve quality neurology care, including during the COVID-19 pandemic.
