Association of Gray Matter Atrophy Patterns With Clinical Phenotype and Progression in Multiple Sclerosis

In the Article “Association of Gray Matter Atrophy Patterns With Clinical Phenotype and Progression in Multiple Sclerosis” by M. A. Rocca et al.¹, the first sentence of the Abstract under Objectives should read, “Gray matter (GM) involvement is clinically relevant in multiple sclerosis (MS).” The publisher regrets the error.

Neurology® Published Ahead of Print articles have been peer reviewed and accepted for publication. This manuscript will be published in its final form after copyediting, page composition, and review of proofs. Errors that could affect the content may be corrected during these processes.
