CORRECTION

High Prevalence of Neutralizing Antibodies After Long-term Botulinum Neurotoxin Therapy

In the Article “High Prevalence of Neutralizing Antibodies After Long-term Botulinum Neurotoxin Therapy” by Albrecht et al.¹, the third sentence of the Conclusions paragraph in the Abstract should read: “However, in addition to avoiding booster injections and extending the interval between injections, reducing the individual injected doses may diminish the risk of NAb induction independently of the indication for which BoNT/A is used.” The authors regret the error.
