Neurology® Published Ahead of Print articles have been peer reviewed and accepted for publication. This manuscript will be published in its final form after copyediting, page composition, and review of proofs. Errors that could affect the content may be corrected during these processes.
In the research article previously titled “Gender Representation Among Physician Authors of American Academy of Neurology Clinical Practice Guidelines,” by Ross et al\textsuperscript{1}, several changes were made after online-first publication of the accepted manuscript before final publication. The article title was revised, along with the titles of Figures 1, 2, 3, and 4. Wording changes were made throughout the article, along with the additions of new paragraphs in the Results and Discussion, an eAppendix, the “Subanalysis of AAN Developed PGs” subsection, and Figure 5 in the Results. The authors regret the confusion.
