CORRECTION

Association of Endovascular Thrombectomy With Functional Outcome in Patients With Acute Stroke With a Large Ischemic Core

In the Research Article “Association of Endovascular Thrombectomy With Functional Outcome in Patients With Acute Stroke With a Large Ischemic Core” by Garcia-Esperon et al.¹, the fifth sentence of the Results section of the Abstract should read “The benefit was seen predominantly in those with 70–100 mL core volume (71/135 [52.6%] EVT-treated), with 45.3% in the EVT-treated vs 21% in the non-EVT group achieving a fair outcome (aOR 2.5, 95% CI 1–6.2, $p = 0.005$).” The authors regret the error.
